

Youssef Ahmed Hassan Nor Eldin

Full Stack Software Developer

Cairo, Egypt | [linkedin.com/in/youssef-ahmed-4b25b5348](https://www.linkedin.com/in/youssef-ahmed-4b25b5348) | github.com/Y0ussef-01
josefahmed357@gmail.com

OBJECTIVE

Full Stack Software Developer with a strong foundation in Java, Spring Boot, and modern web technologies, seeking to contribute to scalable, well-engineered backend and full-stack systems.

EDUCATION

Cairo University, Faculty of Science, Computer Science Department

In Progress

SKILLS

Backend:	Java, Spring Boot, Spring Data JPA, RESTful APIs, Microservices, JDBC, C#
Frontend:	React.js, HTML5, CSS3, JavaScript (ES6+), Responsive Design
Database:	Oracle SQL, MySQL, Database Design, Query Optimization, Normalization
Data Structures:	Arrays, Linked Lists, Trees, Graphs, Hash Tables, Heaps, Sorting & Searching
Algorithms:	Dynamic Programming, BFS/DFS, Dijkstra, Merge Sort, Quick Sort
Languages:	Java, JavaScript, Python, C++, C#, SQL
Tools:	Node.js, Git/GitHub, Maven, Eclipse, VS Code, Postman, Linux
Practices:	OOP, SOLID Principles, Design Patterns, Agile Development

PROJECTS

- **Full Stack Web Application**
Developed a comprehensive full-stack application combining a Java Spring Boot backend with a React.js frontend. Implemented RESTful APIs with proper error handling, authentication, and data validation. Designed an Oracle database schema with normalized tables and optimized SQL queries.
Tech: Spring Boot, React, Oracle SQL, HTML5/CSS3/JavaScript
GitHub: github.com/Y0ussef-01/Software_Project
- **Fighting Game Development**
Built an interactive fighting game with complex game logic and physics simulation. Implemented character movement, collision detection, and battle mechanics using algorithms. Applied object-oriented design patterns for game entities and state management.
Tech: JavaScript, HTML5 Canvas, Game Development Principles
GitHub: github.com/yousif-Ahmed-cs/Fighting-game

KEY COMPETENCIES

- Core Java: OOP, Collections, Exception Handling, Multithreading, File I/O
- Spring Framework: Auto-configuration, Dependency Injection, JPA, Transaction Management
- Databases: MySQL, Oracle SQL, Query Optimization, Indexing, Normalization
- Data Structures & Algorithms: Trees, Graphs, Hash Tables, Heaps, BFS/DFS, Dijkstra, DP, Sorting/Searching

LANGUAGES

- Arabic (Native)
- English (Professional)

ADDITIONAL INFORMATION

- [GitHub Portfolio: Y0ussef-01](https://github.com/Y0ussef-01) — active contributor with multiple production-ready projects
- Open to opportunities: backend development, full-stack development, and software engineering roles
- Continuous learner — eager to pick up new technologies and take on challenging projects
